5

- 1. A tailgate controlled light system, comprising:
- a light unit positionable within a pickup box;
- a control switch electrically connected to said light unit and engageable by a tailgate for opening said control switch; and

an override switch electrically connected to said control switch.

10

2. The tailgate controlled light system of Claim 1, wherein said override switch is electrically connectable to a power source.

15

- 3. The tailgate controlled light system of Claim 1, wherein said light unit is positionable beneath a bedrail of a pickup box.
- 4. The tailgate controlled light system of Claim 1, wherein said control switch is comprised of a depress switch and wherein said control switch is positionable to be engaged by a tailgate when a tailgate is closed within a pickup box.
- 5. The tailgate controlled light system of Claim 1, wherein said override switch allows for a user to terminate power to said light unit regardless of a position of a tailgate.

6. The tailgate controlled light system of Claim 1, wherein said override switch is positionable within a sidewall of said pickup box.
7. The tailgate controlled light system of Claim 1, wherein said power source is comprised of a pickup power supply.
8. The tailgate controlled light system of Claim 1, wherein said power source is comprised of a portable power supply.
9. A tailgate controlled light system, comprising: a light unit attached within a pickup box; a control switch electrically connected to said light unit and engageable by a tailgate for opening said control switch; and an override switch electrically connected to said control switch.
10. The tailgate controlled light system of Claim 9, wherein said override switch is electrically connectable to a power source.
11. The tailgate controlled light system of Claim 9, wherein said light unit is positioned beneath a bedrail of a pickup box.

12. The tailgate controlled light system of Claim 9, wherein said control switch is comprised of a depress switch and wherein said control switch is positioned to be engaged by a tailgate when a tailgate is closed within a pickup box.

5

13. The tailgate controlled light system of Claim 9, wherein said override switch allows for a user to terminate power to said light unit regardless of a position of a tailgate.

10

- 14. The tailgate controlled light system of Claim 9, wherein said override switch is positioned within a sidewall of said pickup box.
- 15. The tailgate controlled light system of Claim 9, wherein said power source is comprised of a pickup power supply.
- 16. The tailgate controlled light system of Claim 9, wherein said power source20 is comprised of a portable power supply.
